

Timetable transfer

Inputting a completed timetable into your chosen software solutions

Transferring from a timetable

Project overview

MIST Services understands that schools have their preferred timetabling solutions, but not all MIS systems play nicely with different timetabling software!

As the timetable is so integral to the MIS, MIST Services will manually copy your completed timetable into the software solution that works with your MIS. Ultimately this means all the timetabling structures are created in the correct format and the school will have a timetable they can maintain throughout the year.

Timings

- Dates to be confirmed as appropriate, although would suggest late July or August to ensure the school timetable is complete for a September start
- MIST Services require up to 7 working days from the date of receiving the timetable information

Considerations

- The timetable file should ideally use the teacher codes as used by your school MIS
- The timetable file should ideally use the department/subject codes as used by your school MIS
- The timetable file should ideally use the room codes as used by your MIS
- If the codes do not match, a list preferably in Excel to demonstrate the mappings will be required.
- This is a one-off transfer so any further changes are implemented by the establishment.
- The transfer should only be done when the timetable is completed! If we have started the transfer and you modify your existing timetable and need us to work on that file then we'll charge £75+vat per hour to check through the differences
